

For immediate Release

**GaiaDoc has launched a fit for purpose replacement text for COP 21
Paris Urgent International Draft**

EMERGENCY CLIMATE CHANGE PREVENTION CHARTER

With regards to the Climate Change Prevention Meeting in Paris, COP 21, we are deeply concerned that the current text under negotiation is fundamentally flawed as its parameters for emission reductions are so low as to at best create an environment in which knock on effects would make suggested actions useless and lead us to irreversible climate destabilisation. That position makes no sense both in the scientific and common sense. As such we have totally re-written the document with the scientific realities as our parameters.

This Emergency DRAFT International Legally Binding CCPC for Climate Change Prevention is called the:

Climate Change Prevention Charter (CCPC)

And replaces the Draft CCPC and draft decision on workstreams 1 and 2 of the Ad Hoc Working Group on the Durban Platform for Enhanced Action; Work of the ADP contact group; Edited version of 6 November 2015; Re-issued 10 November 2015.

We must work to get this replacement text tabled at the United Nations COP 21 and force our leaders to comply with their legal duties of care to us, our children and the planet.

We ask that you pledge to us your support for it, promote it, distribute it and help us to get this tabled to put us back on track. We still have a chance so please we urge you to support us in putting this forward as an alternative bright future for all of human kind.
